• *Résumé current as of May 18, 2022*

Skills

Earth Observation Data Analysis	Forest health, land use/cover, urban nightlights, machine learning
Modeling	Complex systems, discrete event, agent-based, system dynamics
Economy & Policy Analysis	Microeconomics, ecosystem services, policy frameworks
Decision Support Systems	Remote observation, GIS, econometric, public health
Aerospace Systems Engineering	Satellite design, systems architecture, requirements writing
Coding	Python, Javascript, MATLAB, Bash, Google Earth Engine

Education

Massachusetts Institute of Technology 2018-Present

PhD in Media Arts & Sciences

Expected Graduation: August 2022 GPA: 5.0/5.0

Massachusetts Institute of Technology 2015-2018

Master of Science in Technology & Policy; Master of Science in Aerospace Engineering

Graduation: May 2018 GPA: 4.9/5.0

Texas A&M University 2011-2015

Bachelor of Science in Mechanical Engineering; Bachelor of Art in Philosophy

Honors Minor in Mathematics

Graduation: May 2015 GPA: 3.98/4.0

Research & Employment

MIT Space Enabled, *Graduate Researcher* ..... 08/2018 - Present

Developing integrated, multidomain, sociotechnical system models, standards, and libraries to improve the ability of various groups to use remote observation data for public health and sustainable development purposes and to design new remote observation platforms to better suit their needs.

RAND Corporation, *Summer Associate* ..... 05/2018 - 08/2018

Built a generalized early warning modeling framework as part of a project to identify potential countermeasures to attacks on the US homeland by hypersonic cruise missiles

MIT Systems Engineering Research Initiative, *Graduate Researcher* .. 08/2015 - 05/2018

Research on various systems engineering topics, primarily for the defense sector, on model integration, complexity, emergent behavior, and the non-technical and policy issues that surround them.
Resulted in masters thesis on potential changes and improvements to the US defense acquisition process.

RAND Corporation, *Summer Associate* ..... 05/2017 - 08/2017

Conducted technology forecasting, agent-based modeling, and analysis of alternatives to support military acquisition decisions, particularly with regard to aerial intelligence, reconnaissance, and surveillance.

MIT/SUTD Fellowship, *University Lecturer and Researcher* ..... 01/2016 - 05/2016

Lectured to classes of 30-45 at the Singapore University of Technology and Design on optimization, numerical methods, and differential equations. Also wrote and graded homework, exams, and projects.

Sandia National Laboratories, *Environmental Testing Researcher* ..... 06/2015 - 08/2015

Worked on shock and vibration simulation, development of improved shock and vibration testing methods and analysis algorithms, as well as control system malfunction diagnosis and repair.

TAMU PEDL, ***Undergraduate Researcher*** ..... 01/2013 - 05/2015

Conducted research in the Plasma Engineering Diagnostics Laboratory to make non-thermal, atmospheric pressure plasmas more practical for the deposition of thin films and medical applications such as mitigating the tactile painfulness of using argon as a working fluid on human skin, designing and machining an insulated handle for a portable dielectric barrier discharge jet, and machining and testing a nonthermal plasma grating that sterilizes bioaerosals.

TAMU Qatar, ***Peer Tutor & Test-Prep Instructor*** ..... 01/2014 - 05/2014

Worked as a peer writing tutor for fellow engineering students.

Taught a weekly preparatory class for the science section of the ACT to Qatari high school students.

Assisted in the instruction of a GRE-prep course for fellow engineering students and members of the community.

Flint Hills Resources Corpus Christi Refinery, ***Plant Engineering Intern*** ..... 05/2013 - 08/2013

Served as a project manager for various engineering tasks in scale up to $300,000 including instrumentation, pump, valve, and pipe installation and upgrade. This included hot tap experience.

Learned about regulations and compliance with such authorities as OSHA, TCEQ, and EPA.

Did design work involving heat exchangers, two-phase process, piping, and gas sample collection.

TAMU AggiE-Challenge, ***Undergraduate Researcher*** ..... 08/2012 - 05/2013

Worked as part of an interdisciplinary team of undergraduate engineers working to develop a biomechanical model of the human arm that predicts movement based on electromyography signals for use in powered prostheses and exoskeletons.

Developed a kinematic dynamic model of the human arm based on anatomical data.

TAMU Nuclear Heat Transfer Systems Lab, ***Undergraduate Researcher*** ..... 01/2012 - 05/2012

Conducted research on two-phase, steam-water, counter-current flow limitation experiments and modeling for better understanding of reactor failure scenarios and improved reactor design under Dr. Karen Vierow and Mr. Wes Cullum at the Nuclear Heat Transfer Systems Lab.

Assisted Mr. Cullum in running and problem-solving of flooding initialization condition experiment and ran my own tests towards determining the behavior of the fluid interaction boundary post-flooding.

TAMU AggieSat Lab, ***Team Member*** ..... 09/2011 - 12/2012

The AggieSat Lab student organization designs and launches satellites under the LONESTAR program towards developing and improving an automated dual-satellite rendezvous system.

Worked as part of the Structure, Mechanical, Thermal, Radiation Subsystem where I designed and modeled structural components; ran static, vibration, and thermal simulations on the overall structure; and attended a Critical Design Review at NASA's Johnson Space Center.

Extracurricular & Service Activities

MIT Graduate Student Council, ***Various Leadership Roles*** ..... 06/2018 - Present
As External Affairs Board Chair, lead MIT graduate students' advocacy and public outreach activities, including legislative advocacy at the local, state, and federal levels.
As University Liaison, represented MIT to other universities, including at conferences and legislative action days organized by the National Association of Professional and Graduate Students.

MIT Science Policy Review, ***Associate Editor*** ..... 06/2019 - 08/2020
Provided feedback to authors and managed the peer review process for a researcher-run publication founded in 2019 whose primary purpose is to publish accessible and authoritative science policy reviews authored by members of the broader MIT community for dissemination to the wider public.

Science Policy Initiative, ***Various Leadership Roles*** ..... 06/2015 - 05/2020
MIT graduate organization dedicated to educating students on the role science plays in policy-making, the effects of policy on the scientific community, and how to engage in policy advocacy.
As President, lead the organization through several changes, including commissioning a history doc-

umentation effort and expanding the science policy bootcamp.
As Special Events Coordinator, planned numerous activities including a full lecture series on innovation policy issues, faculty panels, student panels, and faculty lunch discussions.
As Congressional Visit Days Co-Chair, organized a multi-day trip to Washington DC where MIT students met with numerous Congressional offices as part of the broader STEM on the Hill event hosted by the Science-Engineering-Technology Working Group.
As Bootcamp Chair, organized two science policy bootcamps (one in person and one virtual) designed to introduce participants to the 'nuts and bolts' of science policy making.

MIT Open Access Task Force, ***Graduate Student Representative*** ..... 09/2017 - Present
Served as the representative of graduate student interests on a task force dedicated to reforming and advancing MIT's open access policies

MIT Committee on the Library System, ***Graduate Student Representative*** ..... 09/2016 - Present
Served as one of two representatives of graduate student interests in the setting of MIT library policy, budget, and proprieties.

Addir Interfaith Program, ***Fellow*** ..... 09/2016 - 05/2017
Participated in weekly reading and discussion groups made up of MIT students from a wide variety of faith-backgrounds, as well as occasional retreats and dinners.

Engineers Without Borders TAMU Chapter, ***Local Project Lead*** ..... 10/2011 - 05/2014
University chapter of an international non-governmental organization primarily dedicated to international service and development work. The local chapter also performs local community improvement projects.
As a local project lead, was in charge of design and construction of a playground at Friend's Congregational Church which was completed in April of 2014.

Invisible Jungle: TAMU Microbiology Radio Show, ***Mentor & Presenter*** ..... 09/2011 - 05/2015
One of three student mentors running the program, a weekly four-minute microbiology news radio show.
Wrote, edited, and recorded scripts; presented Invisible Jungle at conferences; and interviewed A&M professors.

TAMU Undergraduate Research Ambassador ..... 05/2014 - 05/2015
Served in an outreach program to current and prospective A&M students with the goal to increase participation in undergraduate research as well as identify and resolve inefficiencies in the undergraduate research system.

TAMU Mechanical Engineering Spain Study Abroad Experience ..... 05/2014 - 08/2014
Summer term abroad program at various locations in central Spain, including Toledo, Ciudad Real, and the University of Castilla-La Mancha.
Coursework included two upper-level mechanical engineering courses integrated with trips to construction sites.

Texas A&M University at Qatar Study Abroad Experience ..... 01/2014 - 05/2014
Semester abroad at A&M's Qatar campus, including engineering classes, paid work tutoring peers, attendance at various seminars including a TEDx event, and visiting local and regional cultural and historical sites.

Boy Scouts of America, ***Eagle Scout & Order of the Arrow Member*** ... 08/2004 - Present
Served as Senior Patrol Leader and Senior Troop Guide alternately for Troop 30 in Austin, Texas.
Attended Silver Pines National Youth Leadership Training as well as camping trips and service projects.
Eagle Scout Service Project was constructing an educational garden for Forest Trail Elementary School including multiple raised-beds and crushed granite walkways and gathering circles. The garden has been in active use since construction in 2010.
